WHO'S CALLING  
OUR FAST CONTEST

VOLUME 2 · ISSUE 7

July 2021

## Dear Valued Customer

Does your business use broadband cable modems but have an outdated phone system? At PenTeleData, we offer hosted solutions that have the potential to provide almost all of your company's basic technology needs, including business voice services. It's a "Turn-Key" solution at an affordable price.

Why do our customers choose PenTeleData Voice Services? Our pricing is competitive. The "real price" of other providers has hidden fees and charges that do not appear as a part of the price, but truly add to the cost of the services. We offer many other areas of technology to customize the needs of any business. Our network is reliable. It makes sense to use the same trusted network you've already chosen with our fiber network.

Almost convinced or have some questions? Give us a call. We'll be glad to customize a solution specifically for your business.

Thank you for your business and continued support.

Jaime Mendes  
Vice-President of Operations  
PenTeleData

## WELCOME ABOARD!

We appreciate the opportunity to serve companies who have chosen to ride PenTeleData's Fiber Network...

## I.T. CORNER

Add Value to your Commercial Cable Modem Service  
Make your customers want to visit and stay for a while!

## GIG FIBER

Gig Fiber is a Bright Idea!  
Let's Talk about some bright ideas from PenTeleData.

## WHO'S CALLING?

PenTeleData's Cloud Based Phone Service now has a mobile app!

## OUR FAST CONTEST

**What device reveals information about the instantaneous speed of your car?**

One lucky winner will receive a \$150 Amazon gift card.

Rack your brain and figure out the answer to the brain teaser. Then send us an e-mail with your full name, address, daytime telephone number (where we can contact you), and the answer to the brain teaser below, to [chat@corp.ptd.net](mailto:chat@corp.ptd.net). All entries must be received by 7/31/21. Good Luck! PenTeleData

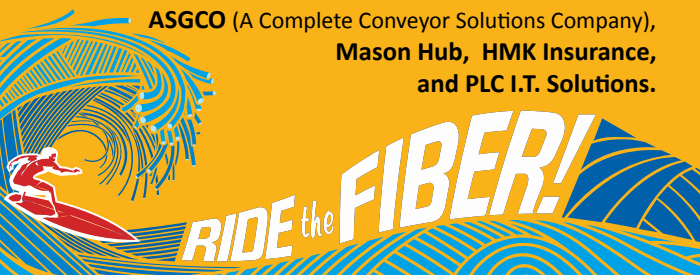

# FAST CONNECTIONS

## WELCOME ABOARD!

We appreciate the opportunity to serve companies who have chosen to ride PenTeleData's Fiber Network.

Welcome aboard to:

**ASGCO** (A Complete Conveyor Solutions Company),  
**Mason Hub**, **HMK Insurance**,  
and **PLC I.T. Solutions**.

## WHO'S CALLING?

### PenTeleData Cloud Based Phone Service Mobile App

PenTeleData Cloud-Based Phone Services now have a mobile app! It's supported on Android, iOS, and Microsoft desktops. With more features than you can probably imagine, you'll always know who's calling. More importantly, you can respond anytime and anywhere, so you can take your business on the go!

The app supports a variety of features, including:

Hold, Transfer, Mute, Speakerphone, Audio recording (Stored on local device), Presence Status, Extension to extension dialing, Conference Calls, Voicemail notification and access, Contacts integration, Dial from Contacts, One on One video calls, Text Messaging, History logs, Text Messaging Quick Responses, Idle Screen, Mid-Call Options, More Call Options, Presence Screen, Text Messaging

Convenience often comes with hidden fees. Here's what you won't get with PenTeleData Voice Services: Extra charges for directory listings, unlisted numbers, a local number portability fee, carrier cost recovery surcharges, an access recovery surcharge, a central office fee, any administrative fees. We do charge the normal sales tax, 911 fee, and Universal Service Fund that all carriers have, but we don't hide any of those other fees to deceive our customers about the actual costs involved with service. That's an important consideration when choosing a service provider.

## I.T. CORNER

### We Can Offer an Added Value to Your Commercial Cable Modem Service

Make your customers want to visit and stay for a while! Whether you have a waiting room, a guest area, tables for working, or any other place you'd like people to hang around (and maybe spend a bit more), Guest Wi-Fi might make them want to stay longer.

Since you're already using PenTeleData for your business, why not offer Guest Wi-Fi to your customers too? PenTeleData I.T. Services can help by designing a system that allows you to offer your customers the Guest Wi-Fi they want, while ensuring the business side can keep doing what it does best...business.

## GIG FIBER IS A BRIGHT IDEA!

### Let's talk about some bright ideas.

According to the History Channel, a simple message is written upside-down across the bottom of the signed document that reads, "Original Declaration of Independence dated 4th July 1776." According to the same article, no one knows who wrote this or when, but it was believed to have been added as a label during the years of the Revolutionary War when parchment was frequently rolled up for transport.

The Declaration of Independence was written on a laptop... Okay, not a modern laptop, but still. Thomas Jefferson drafted the Declaration of Independence on a writing desk that could fit over one's lap. This device was referred to at the time as a "laptop."

In 1958, a history teacher assigned a class assignment to redesign the national flag as both Alaska and Hawaii neared statehood. Robert G. Heft, who was 16 at the time, designed a new flag using the old 48-star flag and \$2.87 worth of blue cloth and white iron-on material. His design earned him a B-minus to which he challenged by sending it to Washington D.C. to be considered by President Dwight D. Eisenhower. According to his obituary, Heft was one of thousands to submit a flag design but he was the only person who actually stitched together a flag and shipped it to D.C. His design became the official flag in 1960.

The word "firework" comes from the Greek word pyrotechnics, which means, very appropriately, "fire art" or "fire skill". The earliest forms of such pyrotechnics can be traced to around 2,000 years ago in China. During the Han Dynasty in 200 B.C., people are said to have roasted bamboo stalks until they would turn black and sizzle, and the air inside the hollow stalks would explode. "Baozhu" is a Mandarin word for firecracker that translates directly to "exploding bamboo." At some point between 600 and 900 A.D., Chinese alchemists—perhaps hoping to discover an elixir for immortality—mixed saltpeter (potassium nitrate, then a common kitchen seasoning), charcoal, sulfur and other ingredients, unwittingly yielding an early form of gunpowder. The Chinese began stuffing the volatile substance into bamboo shoots that were then thrown into the fire to produce a loud blast. The first fireworks were born.

How about a bright idea to support the success of your business? Gig Fiber is a bright idea! Gigabit Internet speeds are a "gold standard" for Internet users. It supports several devices at once and are designed for today's connected offices. Gig Internet offers downloads up to 1 Gig with unlimited bandwidth usage. The result is increased speed, efficiency, and productivity!

Would you like to take credit for a bright idea that helps your business's success? Simply call us to learn more about Gig Fiber.
