## MANAGED SPECIALTY LINES FULLY MANAGED POTS REPLACEMENT

*"The sky is the limit when you move to the cloud with PenTeleData."*

**Jaime Mendes**  
V.P. of Operations, PenTeleData

## FULLY MANAGED POTS REPLACEMENT WITH SINGLE SOLUTION TECHNOLOGY

### WHY MANAGED SPECIALTY LINES?

Thousands of analog devices have historically functioned more successfully on legacy analog connections; however, with carriers increasing rates and decreasing the support of the analog infrastructure, enterprises are searching for alternative solutions.

Our fully managed plain old telephone system (POTS) replacement solution for end-of-life and cost-prohibitive analog lines provides a next-gen alternative.

Managed Specialty Lines is an end-to-end solution that provides quality at scale, simple management, substantial cost savings, and fully managed deployment for a wide range of lines such as alarms, elevators, security gates, meter testing, out-of-band management, and more.

### Consider the Number of Lines Per Site (Multi-Line Sites)

- Fire and burglar alarms
- Gate access
- Employee FOB scanner
- Elevator lines
- Point-of-sale or credit card machines
- Fax machines
- 911 emergency lines

### Key Benefits for Your Business

#### Futureproofed Solution.

Carrier-grade cloud solution allows you to leverage next-gen technology with lower costs, enhanced reliability, and ability to easily convert analog lines to digital lines. Virtually every hardline connection your business has can now be replaced with a singular solution.

#### Reduced Cost.

Replace high maintenance, capex heavy analog hardware with a flexible pricing model that delivers an immediate return on investment (ROI). With per site pricing, achieve greater savings for multi-line sites. Installation, maintenance, and future upgrades are all included.

#### Simple Management.

Everything is included. No need to worry about upgrading technology. Critical systems are monitored and managed, freeing up resources for you to concentrate on your business.

## MANAGED SPECIALTY LINES

### MANAGED SPECIALTY LINES AT WORK

#### WE HAVE MADE IT EASY

> **Equipment**

All CPE hardware is provided, including LTE router, ATA and UPS, as well as backup cellular connectivity for call path resiliency.

> **Installation**

Custom installation, coordination with local guidelines and specialty vendors, including provisioning, installation, call control, and PSTN connectivity.

> **Management**

Proven multi-box solution that provides better quality and easier management than other single box solutions available.

> **Support**

Unified, reliable alerts and alarm reporting. Plus, only manage one vendor for your applications, network, and support — saving your business time and effort.
