PenTeleData®

FASTCONNECTIONS

Dear Valued Customer,

As we approach the end of the year, I can't help but reflect on what celebrating 30 years in business really means. For me, it's all about relationships: with our customers, with our community, and with my coworkers. I work alongside a talented and dedicated team here at PenTeleData. I'm proud of the network we've built and the experience and knowledge our staff brings to our company. Many of our employees have been here for 25 years or more, and in the current job culture, that means a lot.

How can PenTeleData help your company? Whether you're a business who needs a strong, locally owned network and an I.T. Team or you're someone looking for a career with a solid and reputable employer, keep us in mind.

Thank you for your business and continued support.

Jaime Mendes
Vice-President of Operations
PenTeleData

OUR FAST CONTEST

What language is characterized as the fastest language, with 240 words spoken per minute?

One lucky winner will receive a $150 Amazon gift card. Rack your brain and figure out the answer to the brain teaser. Then send us an e-mail with your full name, address, daytime telephone number (where we can contact you), and the answer to the brain teaser below, to chat@corp.ptd.net All entries must be received by 10/31/24.

Good Luck! PenTeleData

PENTELEDATA IS PROUD TO SERVE MILFORD, PA

A visit to the Borough of Milford is a must for the visitor interested in history and architecture. Perched above the Delaware River at the confluence of US Routes 6, 209 and 206, the village was established in 1796 and laid out by Judge John Biddis. He named the streets after his children and family, and the lanes after his favorite fruits and berries. Judge Biddis took his inspiration from the design of Philadelphia, the nation's first capitol. Some say the name Milford came from Milford Haven in Wales, where John Biddis' father William was born. Others say the Wells' mill and the spot where the Delaware was forded resulted in the name Mill-Ford. The street plan is based on Philadelphia with accessible alleys that has immediate visual and symmetrical appeal to a visitor and traveler.

During the nineteenth and early twentieth centuries, Milford was known as a summer resort and trading center. The historic community's commercial life was associated with recreation, entertainment, government, education, and tourism.

Milford has numerous historically significant buildings, mostly constructed in the nineteenth and early twentieth centuries. Of the 655 buildings within the less than 1 square mile boundaries of the Borough, over 400 structures have been listed on the National Register of Historic Places and a historic plaque has been installed on about 200. Many buildings were built before 1900. Some of the most significant include Forest Hall, the Hotel Fauchere, the Pike County Courthouse, Grey Towers, The Columns Museum, the Upper Mill, the Community House, the Callahan House, the Dimmick Inn and Tom Quick Inn.

Based on LinkedIn data on 12,000+ CEOs of companies with 50+ employees across 20 countries.

I.T. CORNER

Remote Proactive Management (RPM)

The world of technology is always changing. Staying on top of things is tough. Getting out in front of malicious attacks and exploits requires constant updates, upgrades, and patching. This can be daunting, but you can rest easily when you know it is being taken care of by professionals. PenTeleData's Remote Proactive Management (RPM) service is for any customer wishing to remain hands-off yet have peace of mind with their IT infrastructure. We offer with subscriptions, levels that make sense for any budget, and for any device, such as servers, workstations, laptops, routers, switches, and access points.

PenTeleData IT Services can remotely install the required software on your network to manage your entire IT infrastructure. Once the software is installed, we have tools to effectively support you with remote access tools, monitoring of system health, managed antivirus, and patch management. Most things can be handled without us having to dispatch a technician on-site. Still, should the need arise, we can dispatch to the customer location with added knowledge and tools to make the service request more efficient.

Be proactive: the time to subscribe to RPM is before you have an issue.
